Summary

Hi, I'm Aron.

I am currently working at Ericsson as a Software Engineer and a
Microservice Developer.

I have been interested in programming since I was a child. I first
came across programming as a concept at the age of 9 when my
dad showed me how to write basic code. Then I started learning
different programming languages on my own until I found JS and
PHP at the age of 15. I really liked these two languages, so at the
age of 16 I started working for a web development company.

I came to university and started studying C++, Java and Python
at an advanced level. These are the ones that laid the foundation
for my programming thinking today. Today, I have learned to work
effectively with frameworks. One of my favorite framework is Laravel
because I really like eloquent. In JavaScript, React and Vue are my
preferred frameworks.

I received an honorary Bachelors degree in Molecular Bionic
Engineering and an honorary Masters degree in Computer Science
from Pazmany Peter Catholic University.

Experience

Ericsson
Software Engineer
February 2022 - Present (7 months)
Budapest, Hungary

Self-employed
Web Application Developer
May 2020 - Present (2 years 4 months)
Budapest, Hungary

I have worked as a contracted full-stack developer for big organizations, such as the PPCU, and Klassis-Z. I have created full-stack applications for these organizations, including the database design, backend and frontend development and design. My applications are used by hundreds of employees, making their life easier and their work more efficient with carefully planned processes, such as document generation, client handling, etc.

Pázmány Péter Katolikus Egyetem
Web Developer
May 2018 - July 2018 (3 months)
Remote

Develop conference websites for the university.

Popular Marketing, Deviron, KleoOs
Website Developer
September 2015 - February 2016 (6 months)

I developed a fully functional dynamic webpage in about every week.

Education

Pázmány Péter Catholic University - Faculty of Information Technology and Bionics
Master of Science - MS, Computer Science Engineering · (February 2021 - July 2022)

Pázmány Péter Katolikus Egyetem
BSc, Molecular Bionics · (2017 - 2020)
